

Dorvic

Multi-roller Skates

THE UK'S PRINCIPAL SKATE AND ROLLER MANUFACTURERS

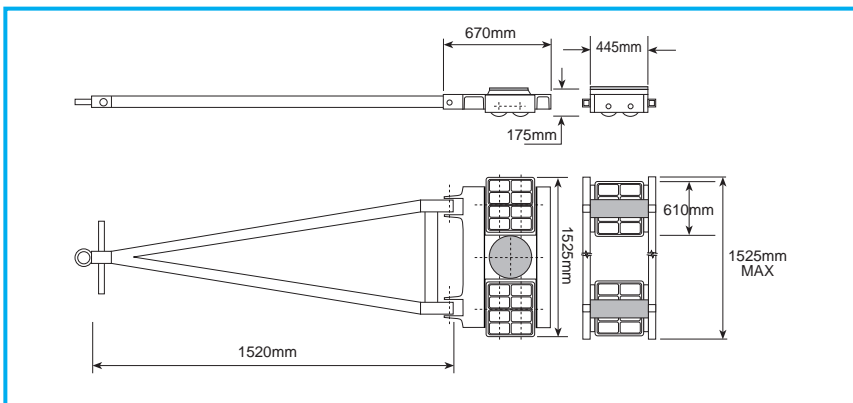

Model: DB7

Set capacity 80,000kgs
(Illustrated)

Supplied with polyurethane wheels only

Dorvic multi-roller skates provide a comprehensive modular load moving system designed to safely cope with moving heavy weights.

- Polyurethane wheels for use on sensitive floors e.g. highly painted, tiled surfaces.
- All wheels have shielded ball bearings for low rolling resistance.
- No floor damage.
- Steerable front skates for total control.
- Steering handle with towing eye.
- Even weight distribution.
- Modular format for three or four point moving.
- Non-slip neoprene pads on each load bearing surface.
- Low weight and compact size for easy transportation.
- Combinations provide easy configurations.
- Manufactured to the highest specifications by Dorvic, The U.K.'s No.1 manufacturer of heavy load moving skates since 1967.
