## Multi-roller Skates

**THE UK'S PRINCIPAL SKATE AND ROLLER MANUFACTURERS**

Dorvic was founded in 1967, and is the principal producer of load moving skates in the U.K. In addition to the standard skates shown in this brochure, Dorvic can also design and manufacture **SPECIALS** to suit a customer's particular application.

### Useage and safety points

Before use please read the notes below:-

#### 1. Do not operate the equipment:

- Until you have ensured that the system has been correctly assembled.
- Until you have ensured that no damage has arisen from any prior misuse of the system.
- Until you have ensured that the weight and centre of gravity of the load being arried is within the capacity of the system.
- On inclined surfaces without using suitable restraint devices on load being carried.
- Over rough or uneven surfaces, deep floor joints, sliding door tracks, manhole covers or any soft surface, eg gravel, tarmac, etc (the harder the surface, the easier the movement).
- Over surfaces that are unable to support the weight of the load.

#### 2. Always:

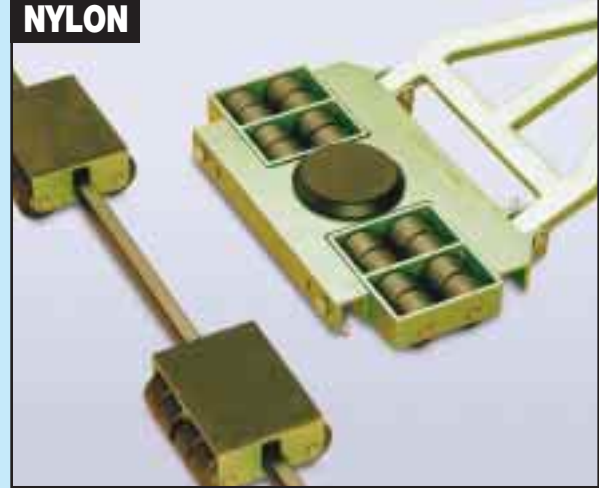

- Keep all parts of the body from beneath load being moved.
- Ensure that the floor surface is free of debris.
- Operate the system within its specified safe working load limits. Avoid shock loading when carrying loads.
- Use the system on a smooth level surface ensuring that the load being carried is uniformly distributed.
- Ensure the person using the system has had previous experience of heavy load moving.
- Ensure that the wheels are free from any swarf, screws and other embedded debris before using the system.
- Use genuine replacement parts which are avilable from the manufacturers.
- Use jacks to lift load onto the system, rather than lowering the load directly from a crane. (Which can result in overloading).

**Warranty:** All components (excepting the wheels and neoprene load pads) are guaranteed for 12 months from date of delivery, against defects in materials and workmanship.
